DETAILED ACTION

Election/Restrictions

1. Pursuant to the procedures set forth in MPEP § 821.04, claims 28, 35-36, 95-96, and 102, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 7/15/04 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-20, 27-29, 31-42, and 92-104 are allowed.
3. The following is an examiner's statement of reasons for allowance: the method of independent claims 1 defines over the prior art of record because the prior art does not teach, suggest, nor render obvious pressing with pliable material wherein pressure is

applied to said food items in said step of pressing using said pliable material in a manner effective for rupturing said collagen protein layer sufficiently to form an opening therethrough, the method of independent claims 27 and 92 define over the prior art of record because the prior art does not teach, suggest, nor render obvious the food item not being frozen, the method of independent claim 101 defines over the prior art of record because the prior art does not teach, suggest, nor render obvious a pliable material which conforms to and completely surrounds the food item during pressing, the method of independent claim 104 defines over the prior art of record because the prior art does not teach, suggest, nor render obvious said first layer is a cover for a plunger and said second layer covers at least an interior portion of a cavity wherein said plunger is receivable for pressing said food items.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
